ADVISORY No. 18
Series of 2025

***Raising Awareness on the Resurgence of COVID-19
and Spread of Monkeypox***

In light of the recent reports on the increasing trend on COVID-19 cases in specific areas of Southeast Asia, although recent trends also indicate a slight decrease in reported cases of COVID-19 in the Philippines, everyone is enjoined to stay informed through the official channels of the Department of Health (DOH), and continue practicing preventive and protective measures as follows:

- Wear face masks in healthcare facilities
- Stay home when sick
- Cover your mouth when coughing and sneezing
- Regularly wash hands with soap and water
- Seek early consultation for symptoms

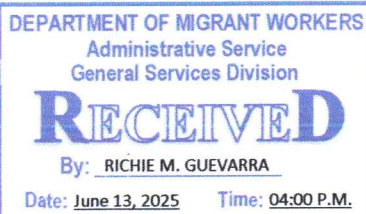

Further, while the DOH dismissed rumors and claims of rising monkeypox cases that may lead to a lockdown, everyone is encouraged to observe health and safety measures, aside from those mentioned above:

- Handle and prepare food safely
- Clean and disinfect commonly used surfaces
- No sharing of personal items
- Avoid touching wild animals
- Limit going out

For information and guidance.
